

Guidelines for Young Researchers Rapid Presentation (YRP)

Young Researchers Rapid Presentation is designed to encourage young researchers (only PhD Scholars) to present the essence and innovation of their research findings to the scientific forum. The selected candidates will have to make both Presentation and Poster of the same work (check the separate poster guidelines attached).

Please follow the guidelines mentioned below.

Type	Total	Slides
Young Researchers Rapid Presentation	4 minutes	Max 7 slides

- All presentations will start and stop as per the scheduled time, and this will be strictly enforced by the Session Chairs.
- Please focus on the essence and innovation of your research and eliminate Introduction, Literature Review and lengthy discussion. Please do not read your slides.
- Avoid overly “busy” slides that have a lot of wording. Make use of images, graphics and other forms of media to demonstrate and explain technical and scientific contents of your study and flow and connectivity in presentation should be maintained.
- Please ensure that your presentation does not go over your allotted time (**4 minutes**) since time is an important parameter that will be considered for evaluation. If you do not complete presentation in allotted time, negative scores will be given.
- Please hand over your presentation slides at the ‘**Resource Desk**’ on the day of your presentation (before 10 am on 24th November 2018). Scientific team will upload all the presentations before the session begins.
- Report to the Technical Committee, 15 minutes before the start of session to ensure your presence. Please sit in the designated area prior to the beginning of the session, and come forward on to the stage while the moderator is introducing your presentation.
- Both Rapid as well as Poster Presentations will be evaluated by taking combined scores and awards will be declared in the closing session.
- If you have questions about your presentation, please contact the scientific team (s.biosd2018@gmail.com).
